

SAIFELDIN MOHAMED SAIED

Software Engineering Student

+20 104 414 0895 | seifmo105@gmail.com | linkedin.com/in/seif-said-a9441b366 | github.com/seifmomo | Mokattam, Cairo, Egypt

Software Engineering student at ECU - full-stack web, AI/ML, and real-time graphics. 15 projects shipped, several with live demos and hand-rolled math. Seeking a 2026 software engineering internship.

B.Sc. Software Engineering - Egyptian Chinese University (ECU) 2025 - Present, Cairo

Previously: Cairo University, Faculty of Computers & AI (2024 - 2025)

American Diploma - Dome International Schools Graduated 2024, Giza

FEATURED PROJECT

RAFIQ - AI Accessibility Marketplace for People with Disabilities | Kotlin / Jetpack Compose / Firebase / PostgreSQL

- Two-sided marketplace: book trained, verified, rated assistants (wheelchair, sign-language, vision, elderly) with AI matching and "why this assistant" explanations.
- Offline-first accessibility suite: MediaPipe sign-language (10 signs), voice assistant with text-to-speech, accessible map, and AI chat with graceful fallback.
- Real emergency path: accelerometer fall detection, 10-second cancel, then SMS + Firebase guardian alerts; live Google Maps tracking and push notifications.
- Google Pay sandbox checkout, Room booking history with invoices and ratings; Node.js/Express + PostgreSQL backend with 39/39 unit tests passing. Built in the Impact X startup program.

El Gehad Automotive - Full-Stack Dealership Platform | Node.js / Express / SQLite / JWT

- 71-vehicle catalog with search/filter, pagination, JWT-secured admin CRUD; custom scraper matched real photos for all 71 models; 34 passing end-to-end tests.

Energy Consumption Prediction & Analysis | Python / CatBoost / PyTorch / Scikit-learn

- IQR outlier removal, cyclical time features, StandardScaler; CatBoost vs custom PyTorch NN on MAE / RMSE / R2; K-Means + Elbow / Silhouette. [add your R2 / MAE]

Warehouse Multi-Robot Coordination | Python / A* / MAPF

- A* on 10x10 grid; cooperative MAPF with Prioritized Planning; independent A* vs MAPF compared on makespan, collisions and runtime.

3D Maze Game | C++ / OpenGL / FreeGLUT

- Hand-coded 4x4 matrix math - no external libraries; Blinn-Phong with 2 lights, projections and 3 camera modes.

Study Planner - Personalized Schedule Generator | Python / Flask / SQLite / Bootstrap

- Priority scheduling auto-assigns study blocks with 15-min breaks - cuts scheduling from 30+ min to zero.

Generative AI Foundation Program - Commercial International Bank (CIB) | Aug 2026, Cairo

- Completed month-long GenAI program (LLMs, foundation models, prompt engineering) as part of CIB Summer Internship 2026.
- Mapped GenAI applications in financial services: customer experience, digital banking transformation, fraud detection.

IT Summer Trainee - Konooz Misr for Marble and Granite | Jun - Aug 2024, Cairo

- Networking: cable management, switch configuration, connectivity troubleshooting; contributed to internal software projects.

NovaStar Certified LED Screen Technician (NCE) - NovaStar Technologies | May 2026, No. 2026IZZ1066 (valid 2 yrs)

AI Foundations Knowledge Badge - SAS | 2026, Credly verified

Network Security & Ethical Hacking - Mahara-Tech (Ministry of Communications) | 5 certs, Aug - Sep 2024

Languages: C/C++, Python, JavaScript, HTML5, CSS3 | OOP: inheritance, polymorphism, encapsulation, abstract classes, virtual functions

AI/Algo: A* pathfinding, MAPF, prioritized planning, ML, deep learning, K-Means | Web: Flask, Node.js, Express, REST, SQLite, JWT, Bootstrap 5

Android: Kotlin, Jetpack Compose, Room, Firebase, MediaPipe | Graphics: OpenGL, GLSL | Currently learning: CUDA, Docker, Next.js

Arabic (Native) | English (Proficient) | German (Intermediate)
